

A long look forward...

Realizing a steadily increasing demand for durable, puncture-proof and quiet wheels, we have added another 40% of manufacturing capacity this past year. Many of our customers are discovering how our ability to customize and innovate has great benefits to them. Our passion for excellence is not just a slogan; it's a total commitment to our clients.

ROI is not about buying [or selling] the cheapest; it's about avoiding production down time, avoiding warranty claims and adding value and margin to your finished products.

Stability, durability, a broad array of tire sizes, bore sizes, bearings and several distinct types of wheels, including non-marking, assure one level of how we meet needs. Our capability to eliminate spacers by creating custom wheels assure quiet, side impact resistant and superior load bearing benefits. This extra level of assurance means that you can enjoy absolute confidence that we can solve any issues that involve our wheels.

Our customers recognize excellence in both our products and our service...

"Roll Tech is my only "no-worries" supplier. The products are as high quality as the customer service, and the warranties are great!"

Joe T. Buyer

We can't expect every potential customer to know our capabilities, our passion for shared success and our standard of excellence. But we can invite you to discover how we can make you look good with a better understanding of why we are successful.

Our goal is to make you look good in your role as decision maker.

ROLL-TECH

"The Best Little Wheel House In America"™
...Get to know Roll-Tech, Inc

ROLL-TECH

***Your products handle moving materials;
We handle better ways of moving your products.***

We started rolling in 1995 in Hickory, NC. Using millions of pounds of granulated rubber made from recycled car and truck tires, we started making solid rubber tires.

These sturdy wheels and tires are 'solid solutions' to Material handling problems.

We have invested heavily in state-of-the-art molding dies and equipment to also manufacture custom plastic wheel hubs from post-consumer recycled milk bottles and soap containers. We were "green" in a very significant way before it was 'cool' to be green.

***What goes around comes around.
Our products themselves are recyclable***

Why Choose Roll-Tech?

Able To Provide Custom Approaches To Problem-Solving

Choose from a wide array of “standard” product configurations or tell us what you need and we’ll handle it.

A Worry-Free Vendor

Roll-Tech’s consistent reliability in product quality, delivery, and customer service means we always make you and your company look good.

No Minimum Order Quantities on Standard Styles and Products

Delivery complete and on time. We make it easy to do business and we genuinely appreciate your business.

A Value-Added Edge

The quality and benefits of Roll-Tech wheels add to perceptions of quality and value; using our products will enhance your profit opportunities.

An Environmentally-Friendly, “Green” Enterprise

Virtually all Roll-Tech wheels are made from 100% post-consumer recycled materials. They’ll help you to meet emerging Government mandates for use of recycled (and recyclable) materials in your products. It’s “easy being green” with Roll-Tech wheels.

Overall More Cost-Effectiveness

Roll-Tech stands behind its products with 100% warranties. This translates to an overall, long-term lower cost when using Roll-Tech wheels with your product.

Roll-Tech wheels are manufactured in the Best Little Wheelhouse in America™.

Clean, efficient production is in Hickory, NC, USA.

We use exacting standards of Quality Control.

We offer Flexible Customization.

We use Recycled raw materials with Near Zero Waste.

Roll-Tech wheels: solid tires, solid solutions.

None of our wheels will puncture, run out of air or go flat. Period.

VSP™ Wheels

Material handling wheels for hand trucks, light to medium carts, and portable equipment. They are the original “flat-free” wheels.

Economical solid rubber tires on rugged polypro hubs, for durable, long lasting, reliable, service in almost any environment.

VSP wheels are a cost-effective alternative to maintenance-intensive, flat-prone, pneumatic tires. Load Capacities: 350 to 850 LBS

SnapLock™ Wheels

Wheels specifically designed for automated or semi-automated residential waste collection containers. Superb cold- and warm-weather performance and durability.

Wheels securely “snap/lock” into groove in axle to deliver stronger warranty support for carts, and prevent consumer complaints.

Ecologically-friendly, rubber tread wheels offer “Quiet Quality™” for noise reduction during collection.

Wheel, bore, and axle sleeve, sizes to meet your needs.

Uratech™ Wheels

Material Handling Wheels that roll like pneumatics, but never go flat: for carts, hand trucks, and lawn & garden applications. Premium quality, non-marking wheels; ideal in any environment, especially where quiet-rolling and non-marking wheels are desired. Both Uratech wheel types - open cell (knobby tread) and closed-cell (sawtooth tread) -- are quiet, cushiony, micro-cellular polyurethane foam; as durable as they are light.

Load Capacity 330 to 450 LBS

Our Made In America wheels are designed with your needs in mind.

You owe it to yourself, your customers, and your bottom line, to discover how Roll-Tech wheels can be beneficial alternatives for your products and applications.

Contact us today, and put Roll-Tech’s solid solutions to work for you.
